A final-semester student of the Computer Science MSc programme at ETH Zürich. Currently writing my Master's thesis under Bernhard Haeupler. I'm passionate about graph theory, algorithms, and data structures, but I've been exploring other areas as well. I love tackling interesting problems and pushing the boundaries of human knowledge, especially in a group of similarly passionate people.

Education

Sept. 2021–Now — MSc in Computer Science, **ETH Zürich** *(expected graduation: summer 2024)*
GPA of 5.60 (out of 6.00) after autumn semester 2023

Sept. 2017–June 2021 — Bc. in Computer Science, **Charles University**, Prague
perfect GPA (1.00) throughout the studies and 224 ECTS credits (out of 180 required)

Work & Research Experience

Student Researcher (Nov. 2023–Apr. 2024) – *BARC, University of Copenhagen*, supervisor: Rasmus Pagh

- Multiple projects on **differential privacy** and **instance optimality**.

Research Project (Apr.–Oct. 2023) – *ETH Zürich*, supervisor: Bernhard Haeupler

- We **designed a heap** with a certain beyond-worst-case property and **proved that Dijkstra's algorithm** using any heap with this property **is universally optimal** (as fast as possible on every graph topology).

Software Engineering Intern (Sep. 2022–Feb. 2023) – *Daedalean, Zürich*

- **Designed** and **implemented algorithms** for matching model detections with air traffic data based on their movement patterns, thus **scaling up** model evaluation without human annotation.

Student Researcher (Mar. 2020–Jun. 2021) – *Charles University, Prague*, supervisor: Martin Koutecký

- **Designed** new combinatorial **algorithms** for the multicommodity flow problem (MCF), polynomial with respect to a certain parametrization.
- **Showed exponential lower bounds** on the circuits of the MCF linear program and on its fractionality.

Student Researcher (June 2018–Dec. 2020) – *Czech Technical University, Prague*, supervisor: Zdeněk Hanzálek

- **Proved NP-hardness** of a new periodic scheduling problem and **developed** several **heuristics** for it.

Teaching & Extracurricular Activities

2018–2022 *Czech Olympiad in Informatics* & *Czech IOI Selection Camp* – I proposed and prepared problems, graded solutions and generally helped with the organization.

2017–2023 *KSP* – an algorithmic seminar for Czech highschoolers; **main organizer of the main category** in 2018–2019, managing 10–20 organizers. Co-organised educational camps and **gave lectures**.

2019–2020 TA of Programming for advanced students; *Charles University* (Spring & Fall 2019, Spring 2020).

Achievements & Awards

2021 **ETH-D scholarship** for excellent Master's students (≈ 90 out of 2500 students awarded each year)
2021 ACM-ICPC World Finals 2020 – unofficial participation due to COVID
2018 **ACM-ICPC World Finals** – 56th place out of 140 teams
2017 International Olympiad in Informatics (**IOI**) – **Silver medal**, 69th place out of 304 participants
2016 International Olympiad in Informatics (IOI) – Bronze medal, 154th place out of 308 participants
